Professional Summary

Software Engineering graduate with hands-on experience in web development, specializing in the **MERN stack** (MongoDB, Express.js, React, Node.js). Skilled in building responsive and user-friendly interfaces, secure authentication systems, and real-time web applications. Passionate about solving real-world problems through clean and efficient code. Seeking a **React Developer Intern** role to apply front-end expertise and grow within a collaborative team.

Experience

Full Stack MERN Developer (Onsite)
Comsats Institute of Information Technology – Final Year Project
March 2024 – February 2025

- Developed a full-stack **car auction platform** with secure authentication, payment integration, and **real-time bidding**.
- Built a clean and responsive **React.js UI** for seamless user experience.
- Designed and consumed **REST APIs**, ensuring smooth communication between frontend and backend.
- Optimized **MongoDB queries** for faster performance.

Skills

Programming & Frontend: React.js, JavaScript (ES6+), HTML5, CSS3
Frameworks & Tools: Git, GitHub, VS Code
Databases: MongoDB
Other: UI/UX Design Principles, Responsive Web Design
